

Announcement

Matsushita Electric Industrial Co., Ltd joins the W-CDMA Patent Licensing Programme

Stamford, UK, 14 April 2008.

Today, 3G Licensing, the licensing administrator of the W-CDMA Patent Licensing Programme, announced that Matsushita Electric Industrial Co., Ltd (“Matsushita”) has joined the W-CDMA Patent Licensing Programme as a licensor.

The claimed W-CDMA essential patents belonging to Matsushita will be evaluated during 2008 and beyond and, once certified as W-CDMA Essential Patents, will be made available under the Joint License Agreements for terminals. The initial W-CDMA Essential Patents should be available for licensing effective 4Q08.

The membership of Matsushita brings the total number of licensors to twelve companies.

“We are happy that Matsushita is joining the licensing programme since they will bring an additional substantive essential patent portfolio to the FRAND Joint license Agreement for terminals making the license even more beneficial to existing and future licensees, said 3G Licensing Director Brian Kearsey.”
