

Announcement

NTT Corporation joins the W-CDMA Patent Licensing Programme as a licensor

Stamford, UK, 21 March 2006.

Today, 3G Licensing, the licensing administrator of the W-CDMA Patent Licensing Programme, announced that Nippon Telegraph and Telephone Corporation ("NTT") has joined the W-CDMA Patent Licensing Programme.

In joining the Programme NTT is committed to license their essential W-CDMA IPR under fair, reasonable and non-discriminatory (FRAND) terms of the W-CDMA Patent Licensing Programme.

The addition of NTT to the Programme brings the number of licensors to nine (9). The major companies associated with the W-CDMA Patent Licensing Programme are now ETRI (Electronics and Telecommunications Research Institute), Fujitsu, KPN, Mitsubishi Electric, NEC, NTT DoCoMo, NTT, Sharp and Siemens.

The W-CDMA Patent Licensing Programme proposes, for 3G terminal products, a Standard License Agreement (SLA) or Joint License Agreement (JLA) grouping together all relevant W-CDMA FDD certified W-CDMA Essential Patents from those companies joining the Programme.

All parties that make, use, lease, sell and otherwise dispose of or transfer terminals that claim to conform to the W-CDMA FDD standards including ODM, OEM and EMS manufacturers (that is, the actual manufacture of the terminal) must take either a JLA or an individual license from each patent holder under the W-CDMA Patent Licensing Programme.
