

Announcement

Toshiba Corporation joins the W-CDMA Patent Licensing Programme

Stamford, UK, 12 February 2009.

3G Licensing, the licensing administrator of the W-CDMA Patent Licensing Programme, is pleased to announce that Toshiba Corporation (“Toshiba”) has joined the W-CDMA Patent Licensing Programme as a licensor.

The claimed W-CDMA essential patents belonging to Toshiba will be evaluated and, once certified as W-CDMA Essential Patents, will be made available under the Joint License Agreements for terminals. The initial W-CDMA Essential Patents should be available for licensing effective 2Q09.

The membership of Toshiba brings the total number of companies associated with the W-CDMA Patent Licensing Programme to twelve.

“Membership of Toshiba is an additional step in the building of a credible licensing offer for all prospective licensees; we know from meeting prospective licensees worldwide that they are not only interested in the quantity of licensed essential patents but also the number of companies licensing under the programme”, said 3G Licensing Director Brian Kearsey.
